

## **Freshers and Farewell Program**

**2<sup>nd</sup> March 2023**

"ELECTRO-VERSE" - A Farewell and Freshers Program by the Electrical Engineering Department

On March 2, 2023, the students of the Electrical Engineering department orchestrated a one-day event, aptly named "ELECTRO-VERSE," within the premises of the Electrical Engineering department. This event served the dual purpose of bidding farewell to the fourth-year students and extending a warm welcome to the incoming first-year students pursuing B. Tech and M. Tech degrees within the EEN department.

Commencing at 10 a.m. and concluding at 5 p.m., "ELECTRO-VERSE" garnered significant distinction with the honorable presence of our university's esteemed Registrar, Dr. Syed Nurus Salam. Dr. Salam graced the occasion with his presence and delivered an inspiring address to the attending students. The Head of the Electrical Engineering department, Dr. Rumpa Saha, along with other faculty members from the department, extended a warm welcome to the newly enrolled students, marking the commencement of a new chapter in their academic journey.

The event featured a diverse range of cultural activities, including recitations, musical performances, dance exhibitions, and extempore speeches. The participation of a significant number of students contributed to the overall enjoyment of the day. Additionally, the students thoughtfully organized refreshments for all attendees and participants, further enhancing the experience of "ELECTRO-VERSE."
