Preface	xv
Acknowledgement	xix
1 Overview of Hybrid Micromachining and Microfabrication Techniques	1
<i>Sandip Kunar, Akhilesh Kumar Singh, Devarapalli Raviteja, Golam Kibria, Prasenjit Chatterjee, Asma Perveen and Norfazillah Talib</i>	
1.1 Introduction	2
1.2 Classification of Hybrid Micromachining and Microfabrication Techniques	3
1.2.1 Compound Processes	4
1.2.2 Methods Aided by Various Energy Sources	6
1.2.3 Processing Using a Hybrid Tool	9
1.3 Challenges in Hybrid Micromachining	9
1.4 Conclusions	10
1.5 Future Research Opportunities	11
References	11
2 A Review on Experimental Studies in Electrochemical Discharge Machining	17
<i>Pravin Pawar, Amaresh Kumar and Raj Ballav</i>	
2.1 Introduction	17
2.2 Historical Background	18
2.3 Principle of Electrochemical Discharge Machining Process	20
2.4 Basic Mechanism of Electrochemical Discharge Machining Process	20
2.5 Application of ECDM Process	23
2.6 Literature Review on ECDM	23
2.6.1 Literature Review on Theoretical Modeling	23
2.6.2 Literature Review on Internal Behavioral Studies	27

2.6.3	Literature Review on Design of ECDM	30
2.6.4	Literature Review on Workpiece Materials Used in ECDM	33
2.6.5	Literature Review on Tooling Materials and Its Design in ECDM	36
2.6.6	Literature Review on Electrolyte Chemicals Used in ECDM	39
2.6.7	Literature Review on Optimization Techniques Used in ECDM	42
2.7	Conclusion	87
	Acknowledgments	87
	References	87
3	Laser-Assisted Micromilling	101
	<i>Asma Perveen, Sandip Kumar, Golam Kibria and Prasenjit Chatterjee</i>	
3.1	Introduction	102
3.2	Laser-Assisted Micromilling	103
3.2.1	Laser-Assisted Micromilling of Steel Alloys	103
3.2.2	Laser-Assisted Micromilling of Titanium Alloys	105
3.2.3	Laser-Assisted Micromilling of Ni Alloys	108
3.2.4	Laser-Assisted Micromilling of Cementite Carbide	109
3.2.5	Laser-Assisted Micromilling of Ceramics	110
3.3	Conclusion	111
	References	112
4	Ultrasonic-Assisted Electrochemical Micromachining	115
	<i>Sandip Kumar, Itha Veeranjanyulu, S. Rama Sree, Asma Perveen, Norfazillah Talib, Sreenivasa Reddy Medapati and K.V.S.R. Murthy</i>	
4.1	Introduction	116
4.2	Ultrasonic Effect	117
4.2.1	Pumping Effect	117
4.2.2	Cavitation Effect	117
4.3	Experimental Procedure	117
4.4	Results and Discussion	118
4.4.1	Effect of Traditional Electrochemical Micromachining	118
4.4.2	Effect of Electrolyte Jet During Micropatterning	119
4.4.3	Effect of Ultrasonic Assistance During Micropatterning	121

4.4.4	Effect of Ultrasonic Amplitude During Micropatterning	121
4.4.5	Influence of Working Voltage During Micropatterning	121
4.4.6	Influence of Pulse-Off Time During Micropatterning	121
4.4.7	Influence of Electrode Feed Rate During Micropatterning	122
4.5	Conclusions	122
	References	123
5	Micro-Electrochemical Piercing on SS 204	125
	<i>Manas Barman, Premangshu Mukhopadhyay and Goutam Kumar Bose</i>	
5.1	Introduction	125
5.2	Experimentation on SS 204 Plates With Cu Tool Electrodes	126
5.3	Results and Discussions	127
5.4	Conclusions	134
	References	134
6	Laser-Assisted Electrochemical Discharge Micromachining	137
	<i>Sandip Kumar, Kagithapu Rajendra, V. V. D. Praveen Kalepu, Prasenjit Chatterjee, Asma Perveen, Norfazillah Talib and K.V.S.R. Murthy</i>	
6.1	Introduction	138
6.2	Experimental Procedure	140
6.3	Results and Discussion	143
6.3.1	ECDM Pre-Process	143
6.3.2	Laser Pre-Process	145
6.4	Conclusions	147
	References	147
7	Laser-Assisted Hybrid Micromachining Processes and Its Applications	151
	<i>Ravindra Nath Yadav</i>	
7.1	Introduction	152
7.2	Laser-Assisted Hybrid Micromachining	156
7.3	Laser-Assisted Traditional-HMMPs	157
7.3.1	Laser-Assisted Microturning Process	157
7.3.2	Laser-Assisted Microdrilling Process	160
7.3.3	Laser-Assisted Micromilling Process	161
7.3.4	Laser-Assisted Microgrinding Process	162
7.4	Laser-Assisted Nontraditional HMMPs	163

7.4.1	Laser-Assisted Electrodischarge Micromachining	164
7.4.2	Laser-Assisted Electrochemical Micromachining	166
7.4.3	Laser-Assisted Electrochemical Spark Micromachining	167
7.4.4	Laser-Assisted Water Jet Micromachining	168
7.5	Capabilities and Shortfalls of LA-HMMPs	171
7.6	Conclusion	174
	Acknowledgment	174
