The student club “Aliah’s Chemists” is maintained by the present and former students of the Department of Chemistry, Aliah University. They organize online lectures on career opportunities, preparation for different national and state-level competitive examinations, how to get industrial jobs, and on appearances in different interviews. Most of the speakers are students and teachers of the Department of Chemistry, and sometimes some eminent personalities from outside Aliah University are also invited to deliver lectures. Apart from these regular online meetings are also called. This club has been actively working since November 14, 2021.

Importance of Short Notes

Q17. The aspirin molecule is an interesting molecule because it contains both a carboxylic acid and a phenolic hydroxyl group.

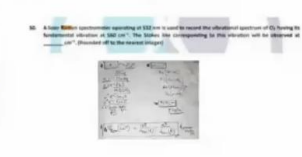

Q18. Aspirin is a weak acid with a pKa of 3.5. Calculate the percentage of aspirin that is ionized in a 0.1 M solution at pH 7.4.

GATE-2021

Q19. A 100 mL aqueous solution containing 0.1 M of a weak acid (pKa = 4.75) is mixed with 100 mL of a 0.1 M solution of its conjugate base. The pH of the resulting solution will be closest to _____ (Round off to the nearest integer).
